

Powered by  
*PureCrop NanoTech*

**Insecticide, Fungicide, Surfactant**

Derived from: **Corn Oil & Soybean Oil**

Preventative Rate: **0.75% – 1%**

Curative Rate: **1% – 2% every 7 – 14 days**

Crops: **Labeled for all crops**

NanoCrop maximized our proprietary *PureCrop NanoTechnology*. Target soft-bodied insects, mold, and mildew, or use as a surfactant to enhance your tank mix. With zero REI, you can use the product up to day of harvest.

## COLLOIDAL SEA

EDTA Free

Seaweed: **1%**

Derived from: **Ascophyllum Nodosum**

General Rate: **1 pt – 1 gal per 100 gals of water**

Crops: **Tree Fruit, Nuts, Grapes, Strawberry and Row Crops**

Ascophyllum Nodosum is used as a true bio-stimulant to increase the plants ability to develop under abnormal condonations improving the plants growth response and nutrient uptakes as well as its ability to trigger a hormone response from the auxins and cytokinins.

*\* CDFA Organic approved*

## MicroCopper

EDTA Free

Copper (Cu): **5%**

Derived from: **Copper Sulfate**

General Rate: **1 pt – 1 gal per 100 gals of water**

Crops: **Tree Fruit, Nuts, Grapes, Strawberry and Row Crops**

As a metabolic catalyst, Copper functions in photosynthesis & reproduction; increases sugar; intensifies color; improves flavor in the crop.

*\* CDFA Organic approved*

## MicroIron

EDTA Free

Iron (Fe): **5%**

Derived from: **Ferrous Sulfate**

General Rate: **1 pt – 1 gal per 100 gals of water**

Crops: **Tree Fruit, Nut, Grapes, Row Crops, Strawberry and Cane Berry**

Iron aids in the plants ability to form chlorophyll as well as proper cell division and growth.

*\* CDFA Organic approved*

## MicroMag

EDTA Free

Magnesium (Mg): **4%**

Derived from: **Magnesium Sulfate**

General Rate: **1 pt – 1 gal per 100 gals of water**

Crops: **Tree Fruit, Nut, Grapes, Row Crops, Strawberry and Cane Berry**

Magnesium is best used to help aid phosphorus mobility and when the commodity is in its sizing/ maturing stage.

## MicroManganese

EDTA Free

Manganese (Mg): **6%**

Derived from: **Manganese Sulfate**

General Rate: **1 pt – 1 gal per 100 gals of water**

Crops: **Tree Fruit, Nut, Grapes, Row Crops, Strawberry and Cane Berry**

Manganese is best used to enhance photosynthesis efficiency contributing to a decrease in abiotic and biotic stresses on the plant.

*\*CDFA Organic approved*

## MicroPro

EDTA Free

**2.5% Zinc (Zn), 1.5% Iron (Fe), 2.5% Manganese (Mg)**

Derived from: **Zinc Sulfate, Ferrous Sulfate, Manganese Sulfate**

General Rate: **1 pt – 1 gal per 100 gals of water**

Crops: **Tree Fruit, Nuts, Grapes, Strawberry and Row Crops**

MicroPro is a three-in-one product that allows you to get out an aliquant amount of Z, F and Mn over multiple applications allowing more a spoon-feeding technique instead of heavy shots of the individual nutrient.

*\*CDFA Organic approved*

## MicroZinc

EDTA Free

Zinc (Zn): **6%**

Derived from: **Zinc Sulfate**

General Rate: **1 pt – 1 gal per 100 gals of water**

Crops: **Tree Fruit, Nut, Grapes, Row Crops, Strawberry and Cane Berry**

Zinc plays a vital role in enzyme production which are responsible for many metabolic reactions within the crop. Growth and development would be stunted without these specific enzymes. Zinc is needed for optimum growth and maximum yield.

*\*CDFA Organic approved*

## PureCrop1 Flagship product and technology

**Insecticide, Fungicide, Surfactant**

Derived from: **Corn Oil & Soybean Oil**

Preventative Rate: **1%**

Curative Rate: **1.5%**

Crops: **Labeled for all crops**

PureCrop1 is our flagship product and is the base technology we use in many of our products to help increase efficiency. *Learn more about our proprietary technology through our website or with our PureCrop NanoTech fact sheet.*
